

Crosscheck between datasets provided by the SCSPI And Marine Traffic (January 2020)

This is the results of the crosscheck of datas provided about 34 vessels allegedly carrying Vietnamese flags and operating in the vicinity of China's Hainan Island on 19-21 January 2020. By and large, the data provided by the South China Sea Strategic Situation Probing Initiative (SCSPI) does not match with the data provided by the Marine Traffic.
